QUEST NIGHT

Card guide: play with one regular deck of cards. Use it with the app in "All physical" or "Hybrid" mode (the host's phone keeps the board, the crown and the narration), or with no phone at all.

* Quest 4 at 7 or more players needs two Sabotage cards to fail. Five rejected parties in a row on one quest and the Shadow wins. Turning on other special cards: swap a Loyal Knight for the Herald (Q♥), or a Traitor for the Enchantress (Q♠), Usurper (J♠) or Outcast (K♣). The app's lobby lists the exact cards for any mix.

Setup

1. Pull the role cards for your table, shuffle them face down and deal one to each player. Look at your own card in secret.
2. Give every player one approve card (a heart) and one reject card (a spade), and put the diamond and club quest cards near the table.
3. Choose the first leader at random (the app's coin or picker works) and give them the ♣10 as the crown. It passes left.
4. Read the eyes-closed script below, then play: the leader names a party, everyone votes at once, the party plays one quest card each face down (Loyal must play a diamond), and the leader shuffles and turns them over.

Eyes-closed script (read aloud)

1. *Everyone, close your eyes and put your hand in a fist on the table.*
2. *Shadow (black cards), except the Outcast, open your eyes and look around. These are your allies. … Shadow, close your eyes.*
3. *Shadow, except the Usurper, raise your thumb. Seer, open your eyes and see who serves the Shadow. … Seer, close your eyes. Shadow, thumbs down.*
4. *If the Herald is in play: Seer and Enchantress, raise your thumb. Herald, open your eyes: one of these is the Seer. … Herald, close your eyes. Thumbs down.*
5. *Everyone, open your eyes.*

Leave out any line for a card that isn't in the game. Quest Night is an original game in the hidden-traitor quest family; names, wording and art are its own.
